Attachment: Memorandum of Agreement

June 26, 2007

Introduction to Protocols Manual

The following protocols are designed to implement and guide operations under the 2007 Memorandum of Agreement on Pollution Prevention and Response between the Thirteenth U.S. Coast Guard District and the state of Washington.

The overarching purpose of the protocols is to maximize the combined oil spill prevention, preparedness, and response efforts of the Thirteenth Coast Guard District and the Washington Department of Ecology by reducing duplication of effort, more effectively using resources, and improving communication, coordination, and collaboration.

The protocols cover 12 work areas common to both agencies' authority and responsibilities regarding prevention, preparedness and response to oil and hazardous substance spills. The protocols represent the current limits of federal and state authority, or ability to jointly address these activities.

The protocols provide procedures for the agencies to coordinate pollution prevention, preparedness and response operations. These formalized working relationships will complement the accomplishment of the joint strategic work plan. As authorities are modified and enhanced, the protocols will be amended accordingly.

We strongly encourage U.S. Coast Guard and Ecology staff to maintain close contact with their counterparts in both agencies, and resolve issues at the lowest possible level consistent with the spirit and intent of the Memorandum of Agreement and these protocols. Please direct questions and suggestions to the points of contact identified in each protocol.

A handwritten signature in black ink, appearing to read "W. T. Devereaux".

W. T. DEVEREAUX
Captain, U.S. Coast Guard
Chief, Prevention Division
By Direction of the Commander,
Thirteenth Coast Guard District
